

```
// Creating a input that only accepts numbers...
class InputNumber extends Component {
  state = { value: '' }

  validate = ({ target }) => {
    // ... Ensure is number
  }

  render() {
    return (
      <input type="text" onChange={this.validate} value={this.state.value} />
    );
  }
}
```

```
// Native input types
```

```
<input type="number" defaultValue={props.value} />
```

```
// Add extra logic with input's attributes
```

```
<input
```

```
  type="text"
```

```
  pattern="[A-Za-z\s]+"
```

```
  maxLength="5"
```

```
  minLength="2"
```

```
/>
```
